

CROWDSTRIKE FALCON X

CrowdStrike Falcon X integrates threat intelligence into endpoint protection, automating incident investigations and speeding breach response

CROWDSTRIKE FALCON X

MAKING PREDICTIVE SECURITY A REALITY

For organizations that are struggling to respond to cybersecurity alerts and don't have the time or expertise to get ahead of emerging threats, CrowdStrike® Falcon X® delivers the critical intelligence you need, while eliminating the resource-draining complexity of incident investigations. Falcon X is the only solution to truly integrate threat intelligence into endpoint protection, automatically performing investigations, speeding response, and enabling security teams to move from a reactive to a predictive, proactive state.

With the unique cloud-native CrowdStrike Falcon® platform as a foundation, cybersecurity teams can now automatically analyze malware found on endpoints, find related samples from the industry's largest malware search engine, and enrich the results with customized threat intelligence. This closed-loop system provides security teams with custom indicators of compromise (IOCs) to share with their other security tools as well as intelligence reporting that tells the complete story of the attack. With a complete understanding of the attack, your team is empowered to respond faster and orchestrate proactive countermeasures across your organization.

Falcon X and integrated threat intelligence is the next step for endpoint protection. It takes antivirus and endpoint detection and response alerts to the next level by not only showing what happened on the endpoint, but also revealing the "who, why and how" behind the attack. Understanding the threat at this level is the key to getting ahead of future attacks and raising the cost to the adversary.

Falcon X enables customers of all sizes to better understand the threats they face and improves the efficacy of their other security investments with actionable and customized intelligence to defend against future attacks, making proactive security a reality.

KEY BENEFITS

Automates investigations into all threats that reach your endpoints

Delivers custom IOCs to orchestrate your security infrastructure

Provides complete information on attacks to enable faster, better decisions

Empowers your team with analysis from CrowdStrike Falcon Intelligence™ experts

Simplifies operations via seamless integration with the CrowdStrike Falcon® platform

KEY PRODUCT CAPABILITIES

AUTOMATE AND SIMPLIFY INCIDENT INVESTIGATIONS

Seamlessly integrate endpoints

Analyze high-impact threats taken directly from your endpoints that are protected by CrowdStrike Falcon platform. Falcon X analysis is presented as part of the detection details of a Falcon endpoint protection alert. Security teams, regardless of size or skill level, will never miss an opportunity to learn from an attack in their environments.

Save time, effort and money

Automate each step of a cyber threat investigation and reduce analysis time from days to minutes. Falcon X combines malware analysis, malware search and threat intelligence into a seamless solution.

Stop bad actors in their tracks

CrowdStrike threat intelligence provides actor attribution to expose the motivation, tools and tradecraft of the attacker. Practical guidance and proactive steps are prescribed so your team can deploy proactive countermeasures and get ahead of future attacks.

SHARE CUSTOM IOCs FOR SECURITY ORCHESTRATION

Defend against the most relevant threats

Focus your team on threats you actually encountered. Falcon X delivers custom IOCs that are derived from the automated analysis of threats taken directly from your endpoints. Custom IOCs include protection against the threat you just encountered plus related threats within the same campaign or malware family. This exclusive capability leads to a deeper understanding of the threat and a custom set of IOCs to defend against future attacks.

Gain access to CrowdStrike IOCs

Falcon X allows you to expand your defenses with real-time access to global IOCs delivered by CrowdStrike.

Easily integrate countermeasures

Protect against future attacks with IOCs that are easily consumed by your security infrastructure. A rich suite of APIs and pre-built tools enable easy orchestration with existing security solutions.

EMPOWER YOUR TEAM WITH CROWDSTRIKE THREAT INTELLIGENCE

Intelligence Reports	Receive trusted, in-depth threat intelligence reports from the global CrowdStrike Falcon Intelligence™ team, including real-time threat alerts, technical reports with expert analysis, and strategic reports outlining threats to industries, regions and infrastructure.
Threat Monitoring	Monitor the web for adversary activity against your organization to prioritize resources and effectively respond to impending cyberattacks.
Expert Malware Analysis	Escalate interesting malware samples to a CrowdStrike expert for deeper research or to get a second opinion.
Intelligence Support	The CrowdStrike team works to ensure it has a clear understanding of your intelligence requirements and that you are successfully onboarded. The team also performs quarterly reviews.
YARA/SNORT Rules	Keep ahead of the latest adversary threats and orchestrate your defenses with YARA and SNORT rules, created and validated by CrowdStrike experts.

FALCON X — PRODUCT OFFERINGS

There are two levels of Falcon X, enabling your organization to choose the option that best fits your needs and business requirements.

ABOUT CROWDSTRIKE

CrowdStrike is the leader in cloud-delivered next-generation endpoint protection. CrowdStrike has revolutionized endpoint protection by being the first and only company to unify next-generation antivirus, endpoint detection and response (EDR), IT hygiene, and a 24/7 managed hunting service — all delivered via a single lightweight agent.
